### **Emory's FY23 Congressionally Directed Spending Requests**

- Nursing Apprenticeship Program
  - This pilot program will be embedded into the existing pre-licensure program InEmory, which is an academic-practice partnership between Emory University, Nell Hodgson Woodruff School of Nursing, and Emory Healthcare. The Nursing Apprenticeship Program will increase student exposure to the hospital setting while offering an innovative approach to nursing education. InEmory currently accepts 80 students per class; with the additional funding provided by this earmark, 40 of these students could be accepted into the Nursing Apprenticeship Program. This pilot program could add 180 additional hours of clinical education in the pre-licensure program.
- Wellness Works Community and Wellness Works Community Annex
  - The Wellness Works Community (WWC) will partner with community-based organizations and outreach workers to provide comprehensive, individualized case management and wrap-around services to meet the needs of trauma survivors to establish holistic health and well-being. WWC will provide a support system that is fully integrated with the Emory/Grady Hospital-Based Violence Intervention Program (HVIP).
  - The Wellness Works Community Annex will focus on communities with high poverty and multiple barriers to health that have been greatly affected by social injustice. The annex will empower survivors of traumatic events to enhance their recovery through imaginative and inspired forms of healing. Annex partners will provide programs designed to connect survivors with group members and various forms of support.
